

NEW PRODUCT

Electromechanical Lift

700 Series

Meet your project schedule with time to spare.

Provides electrically operated synchronized height adjustment during assembly, integration and test activities.

The system is plug and play and with a simple press of a button, the risers can adjust height while the payload is attached to the interfaces.

The load rating of the EML (Electro-Mechanical Lift) Option ranges from 960 lbs – 1,300 lbs as compared to 800 lbs for the HYD (Hydraulic lift) Option. Additionally, the EML Option is compatible in clean room environments. A rechargeable battery option is available.

Electromechanical Lift Rotation Fixtures

Product Series Capabilities for: (XD739/XD747/XD759- EML)

- Load Rating: 960 lbs - 1,300 lbs
- Max Swing Radius: 28" - 48"
- Height Range: 32.8" - 59.0"
- Max Torque: 5,400 in-lbs
- Easy Crank: 2,000 in-lbs

Two Simple Steps to Request a 3D Cad Model

Or call us at 760-727-2700.

1. Create a Model Number (reverse side of the card)
2. Email Model Number to sales@Flotron.com
